

FOR IMMEDIATE RELEASE

Reva Systems to Deliver Integration of RFID Data for the Oracle® E-Business Suite

*Reva provides Oracle E-Business Suite customers with a reliable and scalable platform
for directly tapping into RFID data*

Chelmsford, Mass., April 29, 2008 – Reva Systems, the leading RFID Network Infrastructure provider, today announced that it is working with Oracle to enable Oracle® E-Business Suite customers to capture and utilize high-quality RFID data.

“The powerful combination of Oracle at the enterprise level and Reva at the edge enables world-class companies to harness the value of RFID for process improvement and sustainable competitive advantage across industries, geographies and multiple Oracle Applications,” said Jon Chorley, Oracle’s vice president of SCM product strategy. “Reva makes implementing RFID simple by supporting a structured interface to Oracle Applications. Reva’s technology transforms RFID data into superior asset visibility and supply chain information allowing Oracle users to rely on RFID for every-day operations.”

“The real-time visibility and process improvements that RFID can deliver will generate value for a wide spectrum of enterprises,” said Buck Devashish, Reva vice-president of business development. “Reva complements Oracle’s vision for deploying RFID. By implementing Reva at the edge, Oracle users can quickly and easily incorporate accurate, useful RFID data into the Oracle E-Business Suite at the enterprise level.”

Reva TAPs are purpose-built RFID Network Infrastructure appliances that provide RFID device control and data processing. TAPs install at a facility level to optimally manage the operations of RFID readers and other equipment from many leading providers, collect the raw tag data, process the data for accuracy and then pass only relevant RFID information to the Oracle E-Business Suite. Reva also provides a set of enterprise RFID management tools which Oracle users can rely on to remotely operate RFID infrastructure and devices across global sites.

Reva Systems is a Certified Advantage Partner in the Oracle PartnerNetwork.

About Reva Systems

Reva Systems develops RFID network infrastructure products that enable customers to rapidly deploy scalable solutions in any environment. Reva's TAP appliances facilitate improved system performance, manageability and accuracy while significantly lessening implementation time and complexity. Reva products are delivered by a global network of partners and deployed worldwide by enterprises leveraging innovative RFID applications to generate value in diverse industries.
